

MD. AHASHAN HABIB

AI/ML Engineer

Email: mr.ahashan261@gmail.com | Phone: (+88) 01709-180782 | LinkedIn: LinkedIn | GitHub: GitHub | Portfolio: Portfolio

AI/ML Engineer building production systems with LLMs, RAG, and deep learning. Full-stack developer experienced in scalable ML applications, medical AI platforms, and research. I bring together clean software engineering and cutting-edge AI.

EXPERIENCE

Ethics Advance Technology Ltd. Feb 2025 – Present
AI/ML Engineer Dhaka, Bangladesh

- Applied domain-adapted LLMs with prompt engineering, document chunking, vector DBs, and RAG for a medical LMS.
- Ensured responsible AI practices, including fairness and bias mitigation.
- Deployed LLM-powered solutions into production, integrating them with web-based LMS applications for real-time use.

LUT University, Finland Aug 2024 – Jan 2025
Research Assistant Lappeenranta, Finland

- Implemented and evaluated LLM memory editing techniques, including RL-based approaches for optimal edit locations and directions.
- Developed factual datasets and performed model ranking to assess accuracy and consistency.
- Explored multi-LLM merging to preserve distinct knowledge while maintaining performance.

PROJECTS

- Bangla PDF RAG System** GitHub
FastAPI · RAG · React · FAISS · OCR
An intelligent system that reads Bangla PDFs and provides accurate answers by combining OCR, semantic search, and AI-powered language understanding.
- RAG Q&A and MCQ Generator** GitHub
FastAPI · FAISS · RAG · React · Llama
A RAG system that answers questions, supports chat, and generates MCQs from documents, with FastAPI backend and React frontend for an interactive experience.
- Book Critic App** GitHub
React Native · TypeScript · Express.js · Redux · Expo
Mobile app for discovering, reviewing, and discussing books with Redux state management, pagination, and reusable components.
- DocLink** GitHub
TypeScript · React Native · MySQL · Express · OCR
Medical app that enables users to manage health records, receive condition insights through symptom-based disease classification, and scan documents using OCR.
- ShopSphere** GitHub
React Native · TypeScript · Expo
Eco-themed mobile shopping app featuring product browsing, wishlist, cart functionality, and smooth animated UI.
- Django LMS** GitHub
Django · Python · Stripe · MySQL · Ngrok
LMS backend with role-based access control, JWT authentication, Stripe payments, and REST APIs.

SKILLS

- Languages:** Python, Java, TypeScript, C, C++, JavaScript, Solidity
- Frameworks:** FastAPI, Django, Next.js, React, SQLAlchemy, React Native, Node.js, Express.js
- Databases:** MySQL, PostgreSQL, FAISS, Vector DBs, PgVector
- Technologies:** Blockchain, DSA, OCR, JWT, REST APIs, Stripe, Expo, Redux, Axios
- AI/ML:** LLMs, RAG, LangChain, Transformers, NLP, Hugging Face, Machine Learning, PyTorch, Pandas, Deep Learning, TensorFlow
- Version Control:** Git, GitHub, GitLab

EDUCATION

- United International University** Dhaka
B.Sc. in CSE 2019 – 2023
CGPA: 3.62/4.00
- Govt. Azizul Haque College** Bogura
HSC 2017 – 2019
GPA: 4.83/5.00

ACHIEVEMENTS

- Champion** — Kaggle Competition, UIU (2024)
- Champion** — Software Lab Project Show, UIU (2024)
- Reviewer** — TENSYPMP 2025, Organized by IEEE Region 10 Symposium
- Bangladesh Scouts Award** — Received from the Prime Minister of Bangladesh (2012)

PUBLICATIONS

- A Secure Blockchain Based Brain Tumor Prediction Model Using Swin Transformers** — 2025 INDUSCON, Brazil — Proposed a secure blockchain-integrated Swin Transformer model for accurate brain tumor prediction.
- ADDomics: Enhancing Multiomics Fusion with Autoencoders and Deep Neural Networks** — 2025 TENSYPMP, New Zealand — A multi-omics deep learning framework using autoencoders and DNNs, achieving state-of-the-art disease classification on BRCA and ROSMAP.
- PyroVision: A Deep Learning Based Model for Wildfire Detection in Satellite Imagery** — 2024 ICEEICT, Dhaka — Introduced a CNN-based wildfire detection system with attention mechanisms achieving high accuracy.
